

Bogense Municipal Heat and Power

33.5 Mega Watt gas fired power plant

Denmark

Plant Description

Bogenseværket consists of two Caterpillar gas fired engines producing electricity for more than 5200 households in the municipality of Bogense.

- The capacity of the plant is 33.5 MW.
- The plant was built in 1990.

Environmental Aspects

The plant is part of the overall Danish strategy of becoming self sufficient while at the same time producing electricity and heat in an environmentally responsible manner.

Owner

Bogense Municipality in Denmark.

IGSS Application

IGSS control and supervise the entire plant. One IGSS system with 600 objects have been installed. 2 operator stations monitor and control the plant.

System Integrator

YIT A/S
