

# Elsinore Water Works

Supplying Water to 60,000 People

Denmark

## Plant Description

The water works of Elsinore municipality serves approximately 60,000 inhabitants. 6 water works placed strategically in the Elsinore region supply the water. The water is distributed through approximately 500 km of transmission pipeline.

## Owner

Elsinore municipality owns the water works.

## IGSS Application

The IGSS application serves the water works having a central server with two main workstations. All 5 sub water works can be controlled centrally as well as locally. The system is a 2,000 object IGSS system.

## IGSS Implementation

The IGSS application has been configured and installed by RAMBØLL, Vand og Miljø.
